Event Report

Name of the Event	International conference on Environmental Sustainability, Climate Adaptation & Disaster Management (ESCAD) -2026
Objective of the event	To provide an international platform for researchers, students, and academicians to discuss innovative solutions for environmental sustainability, climate adaptation, and disaster management. The conference aims to promote scientific research, awareness, and sustainable practices for addressing global environmental challenges.
Date, Time and Venue	21/05/26 - 22/05/26, Seminar Hall, CUHP, Shahpur Campus
Convener /Organising Secretary	Dr. Arun Kumar (Convener) /Dr. Dilbag Rana (Organising Secretary)
Organising Unit	Department of Environmental Science, School of Earth & Environmental Science
Participants	114
Outcome of the event	The event provided a valuable platform for sharing knowledge and ideas on environmental sustainability, climate adaptation, and disaster management. It enhanced participants' understanding of current environmental challenges and promoted discussion on innovative and sustainable solutions. The conference also encouraged academic interaction, research collaboration, and awareness regarding sustainable development practices.

Event Detail Report

The International Conference on Environmental Sustainability, Climate Adaptation and Disaster Management – 2026 (ESCAD-2026) was organized to promote scientific discussions on environmental sustainability, climate change, disaster management, and sustainable development. The conference brought together researchers, academicians, scientists, and students from various institutions to share knowledge and innovative ideas.

Inaugural Session

The conference began with the ceremonial lighting of the lamp followed by Vande Mataram and the CUHP Kulgeet. Distinguished guests including Prof. Anil Kumar, Dr. Navneet Sharma, Dr. Bhag Chand Chauhan, and Prof. Y. S. Negi were felicitated for their contributions to science and academia.

Prof. Deepak Pant delivered the welcome address and highlighted the importance of sustainability and environmental conservation. Hon'ble Vice Chancellor Prof. S. P. Bansal emphasized the need for scientific research and collaborative efforts to address climate change, pollution, urbanization, and environmental degradation.

The conference abstract book was also officially released during the inaugural session.

Technical Sessions – Day 1[Keynote speakers]

Prof. Anil Kumar delivered a lecture on the role of microbes in environmental processes and the impact of human activities on climate change. He discussed carbon and nitrogen cycling and emphasized sustainable development and circular economy approaches.

Dr. Lakhveer Singh presented innovative technologies for energy generation from wastewater systems and discussed microbial electrolysis cells and hydrogen economy concepts.

In the post-lunch session, Dr. Navneet Sharma delivered a lecture on CBRN emergency management and discussed modern technologies for protection, detection, and decontamination during chemical and nuclear emergencies.

Prof. M. S. Bhatti delivered an informative lecture on river water quality monitoring, sampling techniques, and hydrochemical parameters. He also explained the role of organizations such as CWC and NMCG in water resource management.

Oral Presentations

The first day of the oral presentation session included various research presentations focused on environmental sustainability, climate change, biodiversity conservation, and geospatial analysis. Researchers and scholars from different institutions presented their studies and findings.

The first presentation by CSIR Palampur discussed the integration of transcriptome and metabolome profiling in *Ferula assa-foetida* L. The study highlighted successful in vitro propagation techniques and the medicinal importance of the plant. Various analyses such as SEM, TEM, and flow cytometry were conducted to study plant morphology and secondary metabolite enrichment.

The second presentation by NIT Hamirpur focused on the spatio-temporal assessment of landslides in Kullu, Himachal Pradesh using NDVI change detection and slope-based susceptibility mapping. Satellite-based geospatial techniques and graphical representations were used to analyze landslide-affected areas and support decision-making processes.

The third presentation from the University of Delhi dealt with ecological niche modelling of *Strobilanthes khuntianus*, an endemic shrub of the Western Ghats. The study emphasized the threats posed by climate change to the species and discussed conservation strategies, habitat suitability, and adaptation measures to prevent extinction.

The final presentation by NIT Hamirpur examined the 30-year retreat analysis of the Siachen Glacier using Google Earth Engine-based remote sensing workflows. The study demonstrated significant glacier retreat between 1995 and 2025, highlighting the impact of climate variability on glacier stability and ice coverage.

Overall, the oral presentations provided valuable insights into current environmental challenges, advanced research methodologies, and sustainable conservation approaches. **Oral Presentations**

Technical Sessions – Day 2 [Keynote speakers]

The second day focused on nuclear safety, waste management, and circular economy approaches.

Dr. Amit Alok from DRDO discussed the evolution of nuclear science, major nuclear disasters such as Chernobyl and Fukushima, radioactive waste management, and the applications of nuclear technology in medicine and agriculture.

Dr. Pamita Bhandari delivered a lecture on the utilization of floral waste generated at temples. She explained how floral waste can be converted into useful products such as compost, incense sticks, natural dyes, and eco-friendly colours, promoting sustainable entrepreneurship and circular economy practices.

Oral Presentation

The second day of oral presentations focused on innovative research related to environmental sustainability, pollution control, health, and disaster management. Researchers and students presented studies highlighting scientific approaches for solving environmental and public health challenges.

Presentations covered topics such as siRNA-based precision therapy for gynaecological cancers, hydrogel nanocomposites for dye adsorption, and the influence of environmental factors on the female microbiome and health. Several studies emphasized sustainable pollution management techniques including phytoremediation using *Ficus elastica* for benzene removal and photocatalytic degradation of organic pollutants using NaTaO₃ nanoparticles.

The session also highlighted sustainable waste management practices in floriculture through dry flower technology, promoting waste-to-wealth approaches and livelihood opportunities. Another important presentation focused on forest fire risk zonation in Hamirpur district using Remote Sensing, GIS, and AHP techniques for disaster resilience and sustainable forest management.

Overall, the presentations demonstrated the importance of eco-friendly technologies, environmental conservation, public health awareness, and geospatial tools in achieving sustainable development and disaster risk reduction.
