(57) Abstract :

A MULTINUCLEUS FOR STORAGE OF HONEY BEE QUEEN ABSTRACT The present invention is a multinucleus instrument for the storage of honey bee queens that allows the storage of twenty, forty and sixty or more than sixty mated queens under natural working conditions. The multinucleus is an instrument which comprises two sections which includes the base of multinucleus and ten rows (single, double, tri and poly nucleus) having two frame bee hive that can be connected and disconnected with the base of multinucleus and can also be used as a packing box through proper packing during transportation of queens with their worker bees after disconnect from base. The double queen excluder of multinucleus can also be used in traditional or standard Newton's beehive for stored surplus mated queens under natural working conditions after minor modifications in the hive (groove formation for double queen excluder).
